

Energy Assessment Attestation

TO: CANADA MORTGAGE AND HOUSING CORPORATION ("CMHC")

RE: Multi-unit residential project located at/to be retrofitted at

(the "Project")

Borrower's name:

I, _____, in my capacity as _____ [certified/licensed/trained]

[engineer, building consultant, energy advisor,
Certified Energy Manager, or other – please specify]

with expertise and experience in the field of

[e.g., energy consumption modelling and assessment
of residential properties],

certify to CMHC that:

1. the energy audit conducted meets ASHRAE Level 3 standards and procedures;
2. the information provided in the *Project Summary*, outlined in the energy modelling study, dated _____, is derived directly from the energy audit and assessment conducted in respect of the Project, using best building energy simulation practices; and
3. the Project is designed to reduce energy consumption and Greenhouse Gases (GHG) by the amounts indicated below:

Energy Consumption Reduction: energy consumption reduction of approximately _____ %
or approximately _____ gigajoule (GJ) per year, relative to pre-retrofit performance.

Greenhouse Gas (GHG) Reduction: emission reduction of approximately _____ %
or approximately _____ metric ton (MT) per year, relative to pre-retrofit performance.

4. The Project is expected to save approximately \$ _____ in energy costs per year.

I acknowledge that the analysis upon which this attestation is based accurately describes the energy and GHG performance outcome of the retrofits to be made to the Project. I acknowledge that the analysis may be audited or assessed for further accuracy and best practices by CMHC. I agree to provide timely responses to questions to CMHC regarding the analysis and findings and, if necessary, provide a revised analysis and attestation.
